NEW RELEASES AND UPGRADES

Stay current and enjoy the latest functionality with immediate access to new releases and upgrades for your licensed SOLIDWORKS software. Receive timely updates that address important issues with service packs.

SHARE AND MARK UP

Take external collaboration to the next level by inviting anyone to view and mark up a 3D model in the cloud, directly from within SOLIDWORKS. Getting real-time feedback and iterating on your work is as easy as sharing a link from SOLIDWORKS. There's no need to install another tool or send a physical file, and it all works from any browser.

STORE AND REVISE

Take advantage of the cloud-based, CAD-aware storage, data sharing, revision management, easy collaboration, and design review capabilities. Save your data securely to the cloud right from SOLIDWORKS, providing you with an online hub to store and access your work *from anywhere, anytime*. If you need to work with other designers, you can lock designs to ensure no one overwrites your work, easily manage revisions, and create detailed markups with redline, measurements, and annotations. Welcome to your single source of truth to keep your tasks on-point and on-time.

MANAGE AND CONTROL

When needed, you have full access to a suite of tools to help you manage data, work through formal change actions and approvals, and keep project tasks in check. Connect SOLIDWORKS to the **3DEXPERIENCE**® platform where your possibilities extend beyond formal data management and into other areas of product development, such as advanced simulation, manufacturing, and marketing.

LOCAL TECHNICAL SUPPORT

Access live technical support from your local, certified SOLIDWORKS VAR, including telephone assistance with product features, commands, installation and troubleshooting for prior and current releases of SOLIDWORKS software. Nearly 400 SOLIDWORKS VARs support customers in 71 countries, delivering high levels of service.
